2009 Excellence in Construction Award
Associated Builders & Contractors

Attention: Awards Committee

Reference: University of Delaware Hartshorn Hall Roofs
Farrell Roofing, Inc.

Committee,

I would like to offer for your consideration of this award the recently completed Hartshorn Hall Roofs project at the University of Delaware by Farrell Roofing, Inc. This project consisted of four very different roofing sections to be repaired and/or re-roofed. Each section differed in that one section was a plain flat roof; one section was flat roof with numerous mechanical penetrations and equipment above, a slate section of roof, and a very large barrel roof area to be re-roofed in metal. All this work was completed with the building fully occupied and in use.

Despite the weather difficulties and delivery issues, Farrell did an excellent job with these roofs. One look at them will tell you true mechanics worked on this project. The project went very smoothly, and we did not have any serious issues within the building while work was ongoing.

The University of Delaware is very happy with the results of this project, and freely recommends Farrell Roofing for this award.

Sincerely,

A handwritten signature in blue ink that reads "Larry E. McGuire".

Larry E. McGuire
Senior Project Manager
